Bokta Peak Kanchenjungha

Tour Overview

Climbing Bokta Peak (6143m), located in the far eastern region of Nepal, is an experience reserved for the most intrepid mountaineers. The journey to its summit passes through the less-traveled routes leading towards Kanchenjunga (8586m), the world's third-highest peak and one of the most challenging among the world's fourteen eight-thousanders. The ascent of Bokta Peak is highly technical, demanding, and involves navigating steep, rocky terrain. The approach follows the southern route to Kanchenjunga's base camp, reaching Bokta Base Camp (5123m) via the Yalung Glacier. A high camp is also established to ensure the summit day is within a reasonable timeframe.
